

# Hardware Review of the Archer and EID Wand

**F**ort Supply Technologies and Juniper Systems, Inc. have formed a partnership to supply livestock management tools in a mobile, rugged package. The ultra-rugged Archer Field PC™ loaded with Fort Supply's FaST software and used with their passive EID wands makes for a robust, mobile solution to animal tracking.

The Archer Field PC with FaST EID™ offers rugged, mobile data acquisition capability to producers, feeders, and veterinarians when using any EID tag, wand or panel reader.

## Point-of-scan data acquisition

- Wand the electronic animal ID ear tag.
- The animal's ID information transfers automatically via stable Bluetooth® wireless technology or cable connection to the Archer Field PC running FaST EID.

## Mobile livestock management solution

The ultra-rugged Archer Field PC from Juniper Systems, Inc. works where you work. It is your reliable field companion, rock solid and field ready in the most extreme environments. Designed for Windows Mobile, the Archer features a wide variety of application software choices. For livestock identification and record-keeping solutions,

Fort Supply Technologies' FaST EID and FaST BRAND products offer a seamless partnership with the Archer.

The Archer Field PC loaded with FaST EID and FaST BRAND provides a secure link between field data and usable, accessible information.

## Features and benefits:

- Metal-encased handheld is waterproof, dustproof, drop proof; and meets IP67 and MIL-STD-810F standards; weighs 17 oz. (482 g) with easy-grip elastomer over-molding.
- High-contrast color display: transfective screen is visible even in bright sunlight; backlit LCD offers visibility in low light.
- Secure data: The Archer's non-volatile memory holds data safely even while battery is removed or charging.
- Simple transfer: Data easily uploads to desktop computer, avoiding hand transcription.
- Convenient communication: Brand inspection information can be sent wirelessly to a brand supervisor. Archer wireless options include WiFi and stable Bluetooth wireless communication for e-mail. Wired connections include USB host and client ports and serial port.
- Long-lasting battery: Intelligent lithium ion battery knows and shows battery status and lasts for 8 to 12 hours of field use.
- Adaptable expandability: Fully sealed, yet user-accessible CF and SD card slots are available for data storage and other peripherals, including camera and scanner.

C O N T A C T :

# Fast EID™ and FaST BRAND™

**F**ort Supply Technologies, a company specializing in effective animal tracking solutions, presents two new software products, Fast EID™ and FaST BRAND™. These new tools make EID scanning and livestock inspection transactions significantly more efficient. Both products run on the handheld, rugged Archer Field PC.

FaST EID offers producers, feeders, and veterinarians the missing link in EID, accurately capturing livestock EID tag data with convenient maintenance of animal records.

#### Features and benefits:

- Interfaces with all major passive panel and wand readers via either proven Bluetooth® wireless technology or wired serial port
- Allows point-of-scan comments to be added easily in the field, i.e., changing the prompt "Birth Date" to "Weaned Date"
- Automatically filters bad data from being recorded and notifies user of duplicates, an incompletely scanned 15-digit number, or incorrect prefix codes

#### Accommodates 30,000+ scans in one or more files

- Writes all data to protected memory, eliminating loss of data or need to re-scan if the battery runs out
- Powered by intelligent Li-Ion battery with 8 to 12 hours life of field use
- Uploads data in easy steps from mobile computer to desktop computer
- May run concurrently with herd management software
- Saves entering repetitive notations with convenient drop-down menus
- Creates files compatible with all certified age, source PVP, QS, NAIS and CCIA programs

FaST BRAND is a comprehensive brand management solution made for brand inspectors. FaST BRAND contains a complete data base by province or state, simplifying brand inspections at the ranch, scale, or sale barn.

#### Features and benefits:

- Designed in consultation with livestock inspectors and proven in field conditions
- Searchable state/province brand database or manual brand input
- All fees adjustable or calculated based on the applicable province or state schedule
- Prompts to add buyer information and details for multiple shippers
- Internal, stable Bluetooth® communication to nearby wireless, battery-powered, plain paper printer for clear copy of inspection
- Automatically creates individual reports allowing easy end-of-month summary of inspections for printing or email
- Allows for wireless transfer of inspection to brand supervisor with WiFi option (sale barn version)
- FaST BRAND-PREMISES version with GPS option allows for non-intrusive premise registration as part of an on-site brand inspection

Fort Supply Technologies' FaST products provide field-ready livestock management solutions. Fort Supply Technologies offers live technical support and customer-specific updates.
