Ultra-high Frequency (UHF)

Cattle Management

Livestock Tag

Specifically designed for use in “speed-of-commerce” movement of animals and in auction barns. No infrastructure changes are necessary.

Optimized for increased read distances from both the front and rear of the animal. Read tags from horseback, from the ATV, or in a sale ring.

Utilizes the common panel dangle tag design to allow visual identification, as well as, electronic identification.

Developed for superior performance even in harsh agricultural environments.

Can be applied with any universal applicator.

Compatible with all ISO 18000-6C/EPCglobal Gen 2 UHF readers and equipment. UHF is a global standard used throughout the world for asset tracking.

SPECIFICATIONS	Read distance with fixed reader	25+ feet
	Read distance with handheld reader	Up to 15 feet
	Memory	650 bits or more
	Handheld reader (recommended)	Motorola MC9090-G RFID
	Fixed reader (recommended)	Sirit Identity 5100
	Frequency	915 Megahertz Gen 2 UHF
	Tag applicator	Universal
	Color and size	White, 3" x 4-1/2"
	Optical numbering	Ink writable
